KP Stakeholders and Port Users

Subject: Important Notice: Khalifa Port Security and Safety Procedures

Dear Valued Customers,

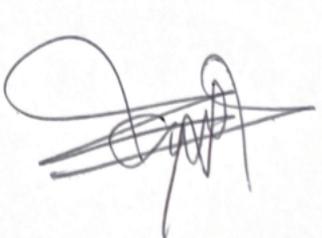

We are reaching out to reiterate the critical importance of adhering to the established safety and security procedures in Khalifa Port. Compliance with these measures is mandatory for all port users, including customers, contractors, and stakeholders, to ensure the safety of everyone within the port premises.

Please review and ensure compliance with the following guidelines:

- Mandatory Safety Induction Training:** All contractors and staff must complete safety induction training before being permitted to work within the port premises.
- Photography and Videography Restrictions:** Photography and videography are strictly prohibited without prior authorization. Please ensure that all your personnel are informed of this policy.
- Vehicle Front-Side Video Cameras:** Vehicles equipped with front-side video cameras are not permitted to enter the port.
- Overloading of Buses:** Drivers must refrain from overloading buses with staff, as this practice is unsafe and must be stopped immediately.

We kindly request that you follow and communicate these guidelines to your teams and ensure strict compliance. Your cooperation is vital to maintaining a secure and safe environment for all personnel and port users.

Best Regards,

Mohammad Al Mheiri
General Manager - Khalifa Port, ADPOC
